

13.2 Guided Exercise: Passive Information Gathering

Resources

Files	None
Machines	None

In this exercise you are required to search and find publicly available information for the domain `hackthissite.com`. You will need to use a web browser for this exercise not in the lab environment.

Go to the link <https://www.netcraft.com/> and in the text box under What's that site running enter `https://www.hackthissite.org` and press Enter.

What's that site running?

Using results from our **internet data mining**, find out the technologies and infrastructure used by any site.

`https://www.hackthissite.org` 

1. Once the results are revealed identify the IP address.
2. Which is the Nameserver of the domain?
3. Which is the Nameserver organisation?
4. Which is the Hosting country?
5. What is the Reverse DNS?
